1 **A joint source-channel model for machine transliteration**
Li Haizhou, Zhang Min, Su Jian
July 2004 ACL '04: Proceedings of the 42nd Annual Meeting on Association for
        Computational Linguistics
Publisher: Association for Computational Linguistics

Additional Information: full citation, abstract, references, cited by

Full text available: 🗎 pdf(247.18 KB) 📄 Publisher Site

Most foreign names are transliterated into Chinese, Japanese or Korean
with approximate phonetic equivalents. The transliteration is usually
achieved through intermediate phonemic mapping. This paper presents a
new framework that allows direct orthographical ...

2 **Enhanced web document summarization using hyperlinks**
J.-Y. Delort, B. Bouchon-Meunier, M. Rifqi
August 2003 HYPERTEXT '03: Proceedings of the fourteenth ACM conference
        on Hypertext and hypermedia
Publisher: ACM

Full text available: 🗎 pdf(167.88 KB) Additional Information: full citation, abstract, references, cited by, index terms

This paper addresses the issue of Web document summarization. As
textual content of Web documents is often scarce or irrelevant and existing
summarization techniques are based on it, many Web pages and websites
cannot be suitably summarized. We consider ...

Keywords: context, hyperlinks, summarization, web document

3 **Source Code Analysis: A Road Map**
David Binkley
May 2007 FOSE '07: 2007 Future of Software Engineering
Publisher: IEEE Computer Society

Full text available: 🗎 pdf(248.65 KB) Additional Information: full citation, abstract, references, cited by, index terms

The automated and semi-automated analysis of source code has remained
a topic of intense research for more than thirty years. During this period,
algorithms and techniques for source-code analysis have changed,
sometimes dramatically. The abilities of ...
